A business owner called the city cell phone and requested an officer at his business. The owner reported he had arrived at the business and noticed his power was out. The owner walked to the back of the store and observed two small locks to a utility power box had been cut. The owner notified CPS and requested them to respond to the location. CPS arrived and informed the owner of three copper wires which had been cut. This is what caused the power outage. It appears someone had tried to steal the copper from the business. CPS estimated the damage to be around \$3000. This case is under investigation.
